Immobile Substrates

- 1 - Bedrock - CC 1-20 - VE
- 2 - Bedrock - CC 1-20 - E
- 3 - Bedrock/Boulder - CC 1-23, 32, 33 - SE
- 4 - Bedrock/Gravel - CC 1-23, 33 - SP
- 5 - Bedrock/Gravel - CC 1-23, 33 - PNP

Mobile/Partially Mobile Substrates

- 6 - Sand & Gravel - CC 24-26, 32 - SP
- 7 - Sand & Gravel - CC 24-26, 32 - VP/P
- 8 - Estuary or Sand/Mud - CC 27-31 - VP/P/SP
- 9 - Sediment - CC 21 - 30 - SE/E
- 10 - Bedrock or Sediment - CC 34 - VP/P/SP
- 11 - Bedrock or Sediment - CC 35 - VP/P/SP

CC Type

13 Rock Beach, Wide	21 Gravel Flat or Fan, Wide
14 Rock Beach, Narrow	22 Gravel Beach
15 Rock Beach, Very Narrow	23 Gravel Flat or Fan, Narrow
16 Rock Beach, Very Very Narrow	24 Sand and Gravel Flat or Fan, Wide
17 Rock Beach, Very Very Very Narrow	25 Sand and Gravel Beach
18 Rock Beach, Very Very Very Very Narrow	26 Sand and Gravel Flat or Fan, Narrow
19 Platform with Sand and Gravel Beach, Wide	27 Sand Beach, Wide
20 Platform with Sand Beach, Narrow	28 Mud Flat
21 Platform with Sand Beach, Very Narrow	29 Mud Flat, Narrow
22 Platform with Sand Beach, Very Very Narrow	30 Sand Beach, Narrow
23 Platform with Sand Beach, Very Very Very Narrow	31 Estuary
24 Platform with Sand Beach, Very Very Very Very Narrow	32 Man-made, permeable
25 Platform with Sand Beach, Very Very Very Very Very Narrow	33 Man-made, impermeable
26 Platform with Sand Beach, Very Very Very Very Very Very Narrow	34 Channel
27 Platform with Sand Beach, Very Very Very Very Very Very Very Narrow	35 Tidal Lagoon

Shoreline Habitat

The Habitat Type provides a simplified picture of the "look" of the unit overall, based on the detailed biophysical attributes that have been mapped. The Habitat Type category is a summary of the observations of both the unit's biological and geomorphological features. Each Habitat Type has a definition that includes the typical substrate, wave exposure and biobands. For example, for the Semi-exposed, immobile substrate Habitat Type, part of the definition of that class is a certain combination of the most likely biobands and indicator species present at a bedrock shoreline with no mobile sediment present.

How is Habitat Type determined?
 Each Habitat Type has typical biological features (including both an indicator species list and typical associated biobands). To determine the Habitat Type, the biomapper looks at the along-shore units as designated and described by the physical mapper, and:
 1. records the observations of the biobands in the unit and looks for indicator species,
 2. assigns a bio-wave exposure category,
 3. reviews the physical mapped information, and
 4. assigns the Habitat Type that best describes the unit.

The Habitat Type is based on the whole unit and is similar to the physical mappers use of the 'Coastal Class' category, in that the detailed across-shore data are summarized into one attribute. The simplified category describes the features of the whole unit.

Habitat Type is a summary of the biophysical classification of the whole shore unit, based on:
 • the biobands observed,
 • the wave exposure as indicated by the bands, and
 • the substrate types in the unit.

Legend Definitions
 CC - Coastal Classification number

Wave Exposure
 E - Exposed - Very high wave exposure, open ocean swells usually fetches >500km
 VE - Very Exposed - Extreme high wave exposure
 SE - Semi Exposed - High wave exposure, open shorelines, areas between fully exposed and more sheltered, usually fetches 50 to 500km
 P - Protected - Low wave exposure, sheltered inlets, usually fetches less than 10km
 SP - Semi Protected - Moderate wave exposure, partly sheltered, usually fetches 10-50km
 VP - Very Protected - Very low wave exposure, fetches < 1km, sheltered anchorages at heads of bays and inlets

Table WCVL GOES WITH BIO_AREAS WCVL SCVL WCVLNorth, JMF
 Habitat Classification for "Exposure Bio" (EXP_BIO) and "Habitat Observed" (HAB_OBS) based on visible macro-biota assemblages for the West Coast Vancouver Island Bio-mapping.

MAJOR SUBSTRATE	BEDROCK/BOULDER	BEDROCK/BOULDER	BEDROCK/BOULDER	BEDROCK/BOULDER	SAND & GRAVEL	SAND & GRAVEL	SAND/MUD	SEDIMENT	BEDROCK OR SEDIMENT
