Immobile Substrates

- 1 - Bedrock - CC 1-20 - VE
- 2 - Bedrock - CC 1-20 - E
- 3 - Bedrock/Boulder - CC 1-23, 32, 33 - SE
- 4 - Bedrock/Gravel - CC 1-23, 33 - SP
- 5 - Bedrock/Gravel - CC 1-23, 33 - PNP

Mobile/Partially Mobile Substrates

- 6 - Sand & Gravel - CC 24-26, 32 - SP
- 7 - Sand & Gravel - CC 24-26, 32 - VP/P
- 8 - Estuary or Sand/Mud - CC 27-31 - VP/P/SP
- 9 - Sediment - CC 21 - 30 - SE/E
- 10 - Bedrock or Sediment - CC 34 - VP/P/SP
- 11 - Bedrock or Sediment - CC 35 - VP/P/SP

Current Dominated

Tidal Lagoon

CC - Coastal Classification number

CC Type	Type	CC Type	Type
13	Rock Ramp, Wide	21	Gravel Flat, Wide
14	Rock Platform, Wide	22	Gravel Beach
15	Rock Cliff, Narrow	23	Gravel Flat or Fan
16	Rock Ramp, Narrow	24	Sand and Gravel Flat or Fan, Wide
17	Rock Platform, Narrow	25	Sand and Gravel Beach
18	Rock and Sediment Shore Types, rock and pockets of classic sediments	26	Sand and Gravel Flat or Fan, narrow
19	Beach with Gravel Beach, Wide	27	Sand Beach, Wide
20	Beach with Gravel Beach, Narrow	28	Sand Beach, Wide
21	Beach with Gravel Beach, Wide	29	Mud Flat
22	Beach with Gravel Beach, Narrow	30	Mud Flat
23	Platform with Gravel Beach, Wide	31	Estuary
24	Platform with Sand and Gravel Beach, Wide	32	Man-made, permeable
25	Platform with Sand and Gravel Beach, Narrow	33	Man-made, impermeable
26	Platform with Sand and Gravel Beach, Wide	34	Channel
27	Platform with Sand and Gravel Beach, Narrow	35	Tidal Lagoon
28	Platform with Sand Beach, Wide		
29	Platform with Sand Beach, Narrow		
30	Platform with Sand Beach, Wide		
31	Platform with Sand Beach, Narrow		

Shoreline Habitat

The Habitat Type provides a simplified picture of the "look" of the unit overall, based on the detailed biological attributes that have been mapped. The Habitat Type category is a summary of the observations of both the units biological and geomorphological features. Each Habitat Type has a definition that includes the typical substrate, wave exposure and biobands. For example, for the Semi-exposed, Immobile substrate Habitat Type, part of the definition of that class is a certain combination of the most likely biobands and indicator species present at a bedrock shoreline with no mobile sediment present.

How is Habitat Type determined?
 Each Habitat Type has typical biological features (including both an indicator species list and typical associated biobands). To determine the Habitat Type, the biomapper looks at the along-shore units as designated and described by the physical mapper, and 1. records the observations of the biobands in the unit and looks for indicator species, 2. assigns a bio-wave exposure category, 3. reviews the physical mapped information, and 4. assigns the Habitat Type that best describes the unit.

The Habitat Type is based on the whole unit and is similar to the physical mappers use of the 'Coastal Class' category, in that the detailed across-shore data are summarized into one attribute. The simplified category describes the features of the whole unit.

Habitat Type is a summary of the biophysical classification of the whole shore unit, based on:

- the biobands observed,
- the wave exposure as indicated by the bands, and
- the substrate types in the unit.

Legend Definitions
 CC - Coastal Classification number

Wave Exposure
 E - Exposed - Very high wave exposure, open ocean swells usually fetches >500km
 VE - Very Exposed - Extreme high wave exposure
 SE - Semi Exposed - High wave exposure, open shorelines, areas between fully exposed and more sheltered, usually fetches 50 to 500km
 P - Protected - Low wave exposure, sheltered inlets, usually fetches less than 10km
 SP - Semi Protected - Moderate wave exposure, partly sheltered, usually fetches 10-50km
 VP - Very Protected - Very low wave exposure, fetches < 1km, sheltered anchorages at heads of bays and inlets

Table MIDCOAST and NORTH COAST project area which includes BCO AREAS CC, IS and NC. The Species' wave exposure/ substrate table for Habitat Classification (IAB, OBS), for the Mid-coast BC study area, from Johnstone Strait/Central Coast Mapping Regions 5, 6 and 7.
